

# MediBond Token Sale Guide

---

## Investing with Ethereum (Using MyEtherWallet)

Step 1:

Visit <https://www.myetherwallet.com>, choose a strong password and click on the “Generate Wallet” button.

The screenshot shows the MyEtherWallet website interface. At the top, there is a navigation bar with the MyEtherWallet logo, the text "Open-Source & Client-Side Ether Wallet · v3.5.8", and language options "English" and "ETH (MyEtherWallet)". Below the navigation bar, there is a menu with links: "Generate Wallet", "Send Ether & Tokens", "Swap", "Send Offline", "Contracts", "View Wallet Info", and "Help". The main content area is titled "Generate Wallet" and contains a form with the instruction "Enter a strong password (at least 9 characters)". Below this instruction is a text input field with the placeholder text "Do NOT forget to save this!". To the right of the input field is a small eye icon. Below the input field is a blue button labeled "Generate Wallet".

Step 2:

Download the Keystore File. Store this file in a safe place as it is your wallet.

Read carefully, then click please click “I understand. Continue”

The screenshot shows the MyEtherWallet website interface. At the top, there is a navigation bar with the MyEtherWallet logo, the text "Open-Source & Client-Side Ether Wallet · v3.5.8", and language options "English" and "ETH (MyEtherWallet)". Below the navigation bar, there is a menu with links: "Generate Wallet", "Send Ether & Tokens", "Swap", "Send Offline", "Contracts", "View Wallet Info", and "Help". The main content area is titled "Save your Wallet File. Don't forget your password." and contains a blue button labeled "Keystore File (UTC / JSON)" with a download icon. Below this button is a blue button labeled "Download". At the bottom of the page, there is a red banner with the text: "MyEtherWallet.com is not a web wallet & does not store or transmit this secret information at any time. If you do not save your wallet file and password, we cannot recover them. Save your wallet file now & back it up in a second location (not on your computer)." Below the banner is a button labeled "I understand. Continue."

### Step 3:

Open the MediBond token sale page (<http://medibond.io/tokensale>) in another tab and find the Ethereum address on that page. Then go back to MyEtherWallet and paste the address you found on the MediBond Token Sale page along with the amount you wish to invest. Consider choosing a gas limit of 300000 for faster transaction processing, and press “Generate Transaction”

### Step 4:

Congratulations! You've successfully participated in the MediBond Token Sale. Details how to add MediBond to your Ether wallet and claim your tokens will be released on September 10th, 2017 ( date for network launch & distribution on our roadmap). The tokens will be sent to your Ethereum address (with which you invested), so keep your keystore file/wallet in a safe place. If you have any questions or concerns, feel free to ask our team any questions on Twitter, Slack, or Telegram.

# Investing with Bitcoin

Step 1). Find or use a Bitcoin wallet that allows you to Sign Messages. We recommend Electrum (lightweight, fast, no need to download entire blockchain) or Bitcoin Core (requires download of 100GB + Bitcoin blockchain).

Step 2). Head over to MediBond's Token Sale Page (<http://medibond.io/tokensale>) and find the Bitcoin deposit address on that page. Send your investment in Bitcoin to that address in exchange for MediBond Tokens.

Step 3). Sign the address from which you sent your Bitcoin with the following message below:

***This is to confirm my participation in the MediBond Token Sale. My Email Is: <Your Email Here> and my Ethereum Address is <Your Ethereum Address Here>***

If you're using Bitcoin Core, please watch the following short video on how to Sign Messages

[https://www.youtube.com/watch?v=3oxM9\\_OCQKM](https://www.youtube.com/watch?v=3oxM9_OCQKM)

If you're using Electrum, please watch the following short video on how to Sign Messages

[https://www.youtube.com/watch?v=pNmC\\_BYO8eM](https://www.youtube.com/watch?v=pNmC_BYO8eM)

Step 5). Head over to <https://goo.gl/forms/oqplYo4VodxkEhVf1> to complete the final step. Complete the entire form, use the exact same Ethereum address / Email address you used in Step 4 when signing your Bitcoin address with the message. Complete the form and submit and we will respond with your invoice confirming your investment in MediBond

Step 6). Congratulations! You've successfully participated in the MediBond Token Sale. Details how to add MediBond to your Ether wallet and claim your tokens will be released on September 10th, 2017 ( date for network launch & distribution on our roadmap). The tokens will be sent to your Ethereum address (which you specified in your signed message and in your invoice request form). If you have any questions or concerns, feel free to ask our team any questions on Twitter, Slack, or Telegram.

# Investing with Litecoin

Step 1). Find or use a Litecoin wallet that allows you to Sign Messages. We recommend LiteVault.net (online). Begin by signing up for an account on <http://LiteVault.net>

Step 2). In another tab, go to MediBond's Token Sale Page (<http://medibond.io/tokensale>) and find the Litecoin deposit address on that page. Send your investment in Litecoin to that address in exchange for MediBond Tokens.

Step 3). Go back to LiteVault.net and on the "Receive (manage addresses)" tab, go to the address from which your Litecoin investment was made and click "Sign"

	Balance	Options	Delete?
